Overviews

The proactive customer notification system receives case and participant data from the IV-D Child Support Enforcement system for generation of notifications to registered clients. The case and participant data is used to create targeted messages to promote successful child support case processing. The information is used to issue notifications that provide information to clients when it is most impactful.

For example:

- CPs could be made aware of payments received limiting inbound phone calls.
- NCPs could be made aware of payment due dates and arrears balances.
- CPs and NCPs could be reminded of upcoming scheduled events.

Thank you employers! The Child Support Program collects almost 75% of support for Wisconsin families through income withholding, By partnering with child support, you can assure that you are staying in compliance, and you are actively involved in the goal to ensure that children receive the support they need and deserve. We greatly appreciate the work that you do to assist us!

Our new employer portal website is a work in progress. We strive to provide employers with helpful information that facilitates the required information reporting, income withholding and remittance processes. Please contact us if you have questions or suggestions for the content provided and we will make every effort to make needed improvements.
